

PRESS RELEASE

Gel Company offers low cost spares and accessories

Gel Company was founded in 1995 in San Francisco and manufactures a range of unique tools and low cost consumables for the life science research community.

The company has set its goal to provide innovative, high quality products with an efficient, friendly service. The aim of Gel Company is to offer all its products at competitive prices.

The focus is to develop, manufacture and supply innovative tools for proteomics, genomics, cell biology, liquid handling and microarray applications to scientists around the world. Gel Company can provide products with superior performance that are simple, safe to use and are environmentally friendly.

The current catalogue brings together over 800 products which include spares and accessories for well-known brands such as ABI, Biorad, Leica and many others. All of these high quality products are available from stock and at a fraction of the cost you would normally pay.

There are distribution points across North America and now also in the UK. Gel Company products can also be purchased through an extensive range of distributors around the world. The aim of Gel Company is to provide its customers with prompt delivery and with a friendly efficient service - all at a very competitive price.

You can view the current catalogue on-line or download a copy for yourself at www.gelcompany.com.

Says Gel Company: "We are very proud of our achievements since 1995 and look forward to continuing to serve our worldwide customers with quality, low cost products".
